Remembering Late Sh. Kiran Nagarkar-
Tribute by Tulsi Vatsal, Nayantara Sahgal and Mitul Dikshit

The 8th edition of Chandigarh Literature Festival –CLF 2019, organized from November 8 till 10, 2019, brought back the literature vibes to the City. The festival was organized by Adab Foundation in association with Dikshant School and Post Government College for Girls, Sector 11, Chandigarh at the college campus. Over three days of literary fervour, the festival saw some of India's best authors and critics talking about the nominated books. The 13 books celebrated at the festival were 'Half The Night Is Gone', 'Ghachar Ghochar', 'Jahangir', 'Ascharyavat', 'Jasmine Days', 'Kolahal Ki Kavitaayen', 'Me Rahas Kauluwen Ebenna', 'Magical Women', 'She Goes To War', 'Polite Society', 'Tawaifnama', 'The Fate of Butterflies', 'Paanch Minute Aur Anya Kahaniyan'. Remembering Late Mr. Kiran Nagarkar, one of India's finest writers, who bid adieu to the world in September this year, a personal tribute was paid by Ms. Nayantara Sehgal, Ms. Tulsi

Vatsal and Mr. Mitul Dikshit. They talked about their enriching association with Mr. Nagarkar and how his sad demise has been a personal loss to them. Mr. Dikshit while talking about Mr. Nagarkar mentioned that a sum of ten lacs has been sanctioned for setting up community libraries in his memory. One of the major highlights of the inaugural session of the fest was the panel discussion on the theme 'Purity and Impurity of Text'. Mr. Jai Arjun moderated the session with the panelists Mr. Jonathan Gil Harris, Ms. Samhita Arni and Mr. Aditya Iyengar. All of them agreed to the fact that the multiplicity of India, a country known for its rich cultural and varied heritage, is certainly under threat. The two theatrical performances added a lot of flavour to the fest. Artist Ulka Mayur re-imagined four female bhakti-poets in a modern-day avatar solving problems faced by contemporary women, while Jyoti Dogra in her play 'Black Hole', attempted to build a bridge between science and the human condition.

We at Dikshant believe that books are a treasure trove of learning and knowledge that leads to curiosity, creativity, imagination, exploration, discovery and finally enthusiastic learners.

To inculcate the values and joy of reading in children from the early years,

the Literula Week was celebrated. The

six day event comprised of a host of interesting and engaging activities for the children like Story Telling Sessions by Class Teachers and Grandparents, making of bookmarks, quiz based on the characters of the story etc. The week concluded with the Character Parade Competition.

Literula Week

22 - 27 July 2019

Story Telling

Storytelling is an important part of teaching within the Waldorf Education as learning is more efficient and memorable when the lessons are conveyed through a story. Therefore, from the current session, we have formally introduced storytelling as an integrated part of the curriculum. *Dikshant International is the first school in tricity to implement the idea which places the story at the heart of learning.* In this teaching methodology, the content of the story provides the basis for further exploration of the topic. The primary goal is to implement a methodology which is a quick, efficient, engaging and enjoyable way to learn.

The kindergarten learners at school, through the exciting world of tales, embark on a journey that combines imagination, language, maths and science into a rich and vibrant story based curriculum. This gives students a chance to explore various concepts in the company of their favorite characters - and have fun while doing it!. All the learning outcomes of Mathematics, Sciences, Language and Arts get fully integrated into the curriculum rather than taught as standalone subjects.

Story telling session by Ms. Neelam Narang

Story telling by Aaryan's (III-A) Mother

Story telling by Vrinda's (V-A) mother

Story telling by Dhriti & Dhvani's (KG) mother

Story telling by Ishana's (KG-B) grandmother

Story telling by Ms. Shweta

Appreciation of good literature develops an ability to respond creatively to different situations and develop critical thinking skills. It helps to connect the world of the author and the reader. As one of the initiatives of the school library, our book lovers celebrated the birthdays of their favourite authors by enacting their stories, role plays, conducting quizzes and decorating the campus around the theme. As a part of the celebrations, various story sessions were organized for different age groups.

Celebrating special days for our book lovers

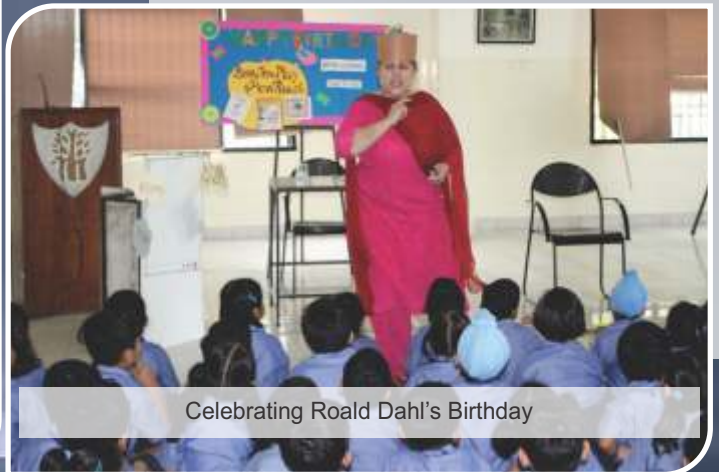

Celebrating Mark Twain's Birthday

The Wizard Festival - presented on J.K. Rowling's Birthday

'Bond-ing' with Ruskin Bond on his Birthday

Celebrating Roald Dahl's Birthday

Think Lab Projects

Basics of Electronics

In this section, student learned about the bread-board, LED, batteries and many components related to electronics. They also made some temporary circuits using breadboards which included lightning of LED, automatic street lights and learned about the series parallel connection. They performed the experiments related to switches to learn how to place the switch in the circuit. The basic part also included the soldering of components on general purpose board. They learned to use soldering iron and understood how to make the permanent circuit boards.

Automatic Bubble Blower

Students made a functioning bubble blower which bubbles up the soap water after particular intervals. In this project, students used a small propeller, DC motor and servo motors.

LED Cube

In this project students built up a 4*4*4 LED Cube. The lighting patterns in the LED Cube are controlled by arduinouno based on the program loaded into it.

Hand Gesture Control Robot

Hand gesture recognition robot, follows the commands made by hand gestures. This robot is made using transmitter circuits, accelerometer sensor and Arduino as the programming platform.

'Otto'- The Robot

Otto walks, dances, makes sounds and avoids obstacles. Otto is a combination of arduino, 3D printable structure, servo motors and batteries. This project provided students the perfect opportunity to learn robotics and assemble their first robot. They understood how to make logical connection between code and action, and how various components and electronics work.

Think Lab of the school becomes the first NASA STEM Innovation Lab International Outpost

Troy D Cline, Director STEM Innovation Lab after interaction with students of Think Lab Program

What an incredible and innovative school. Modeling their student makerspace after NASA's STEM Innovation Lab is inspiring and could serve as a model for other schools around the world.

In today's world, it's important that students gain knowledge and skills to solve problems, make sense of information, and know how to gather and evaluate evidence to make decisions.

To build students' skills, content knowledge, and fluency in STEM fields,

students are given an access to quality learning environment at all stages. Dikshant is the first school to have a Planetarium and space center at the campus, thus, allowing students to explore the world of space science to the maximum potential. Students are equipped to develop skills and knowledge in the areas like Telescope Making, Rocketry, Sky Gazing, Designing, Testing, and Launching Satellites.

STEM Based Curriculum

'Launch into Learning' program for kindergarten and primary section encompasses planetarium shows, space based story sessions, Montessori based space-related activities, board games, artwork, games, competitions and more.

Students of the middle and primary school become a part of one of a kind Think Lab which provides widespread access to modern means for invention. The lab is a hub for innovation, invention, tinkering and giving shape to ideas, thus solving global problems using technology and igniting student's entrepreneurial spirit.

As a part of the space program, students launched a 'CanSat' in the year 2017 followed by Balloon Satellite in the year 2019. This is for the first time in the country that school students have carried out a project at this level.

First School in India to develop satellite - Dikshant SAT-1

Dikshant school has become the first school in India to have a team of students design and develop a High Altitude Balloon Satellite named Dikshant SAT-1. The project has been carried out at the Suresh Naik Centre for Excellence in Planetary Science located at the campus.

The satellite has been designed and developed by 12 young scientists of Dikshant studying in Grade IX and above, under the guidance of experts from Smartcircuits Innovation Pvt. Ltd.

The amateur satellite designed by students was launched on 29th March, 2019 at 2:45 am from Bhatinda and retrieved at 6:30 am from Santokpur Village, Kurukshetra. In its 3 hour flight, the satellite reached to an altitude of 1,50,000 feet in the stratosphere and obtained the value of different environmental parameters. The satellite obtained the video of the whole flight using an on-board action camera. The payload (satellite) was taken to the stratosphere using a helium balloon.

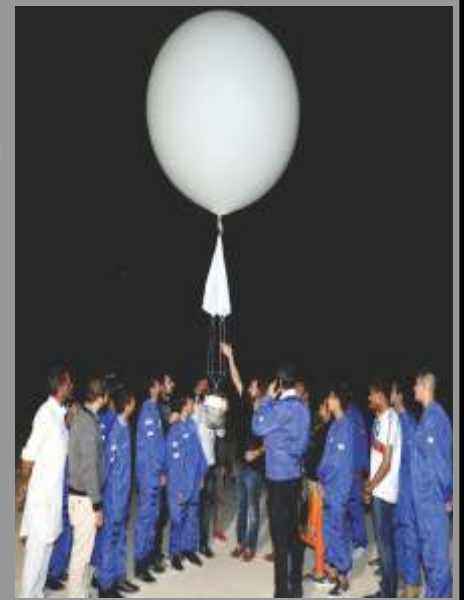

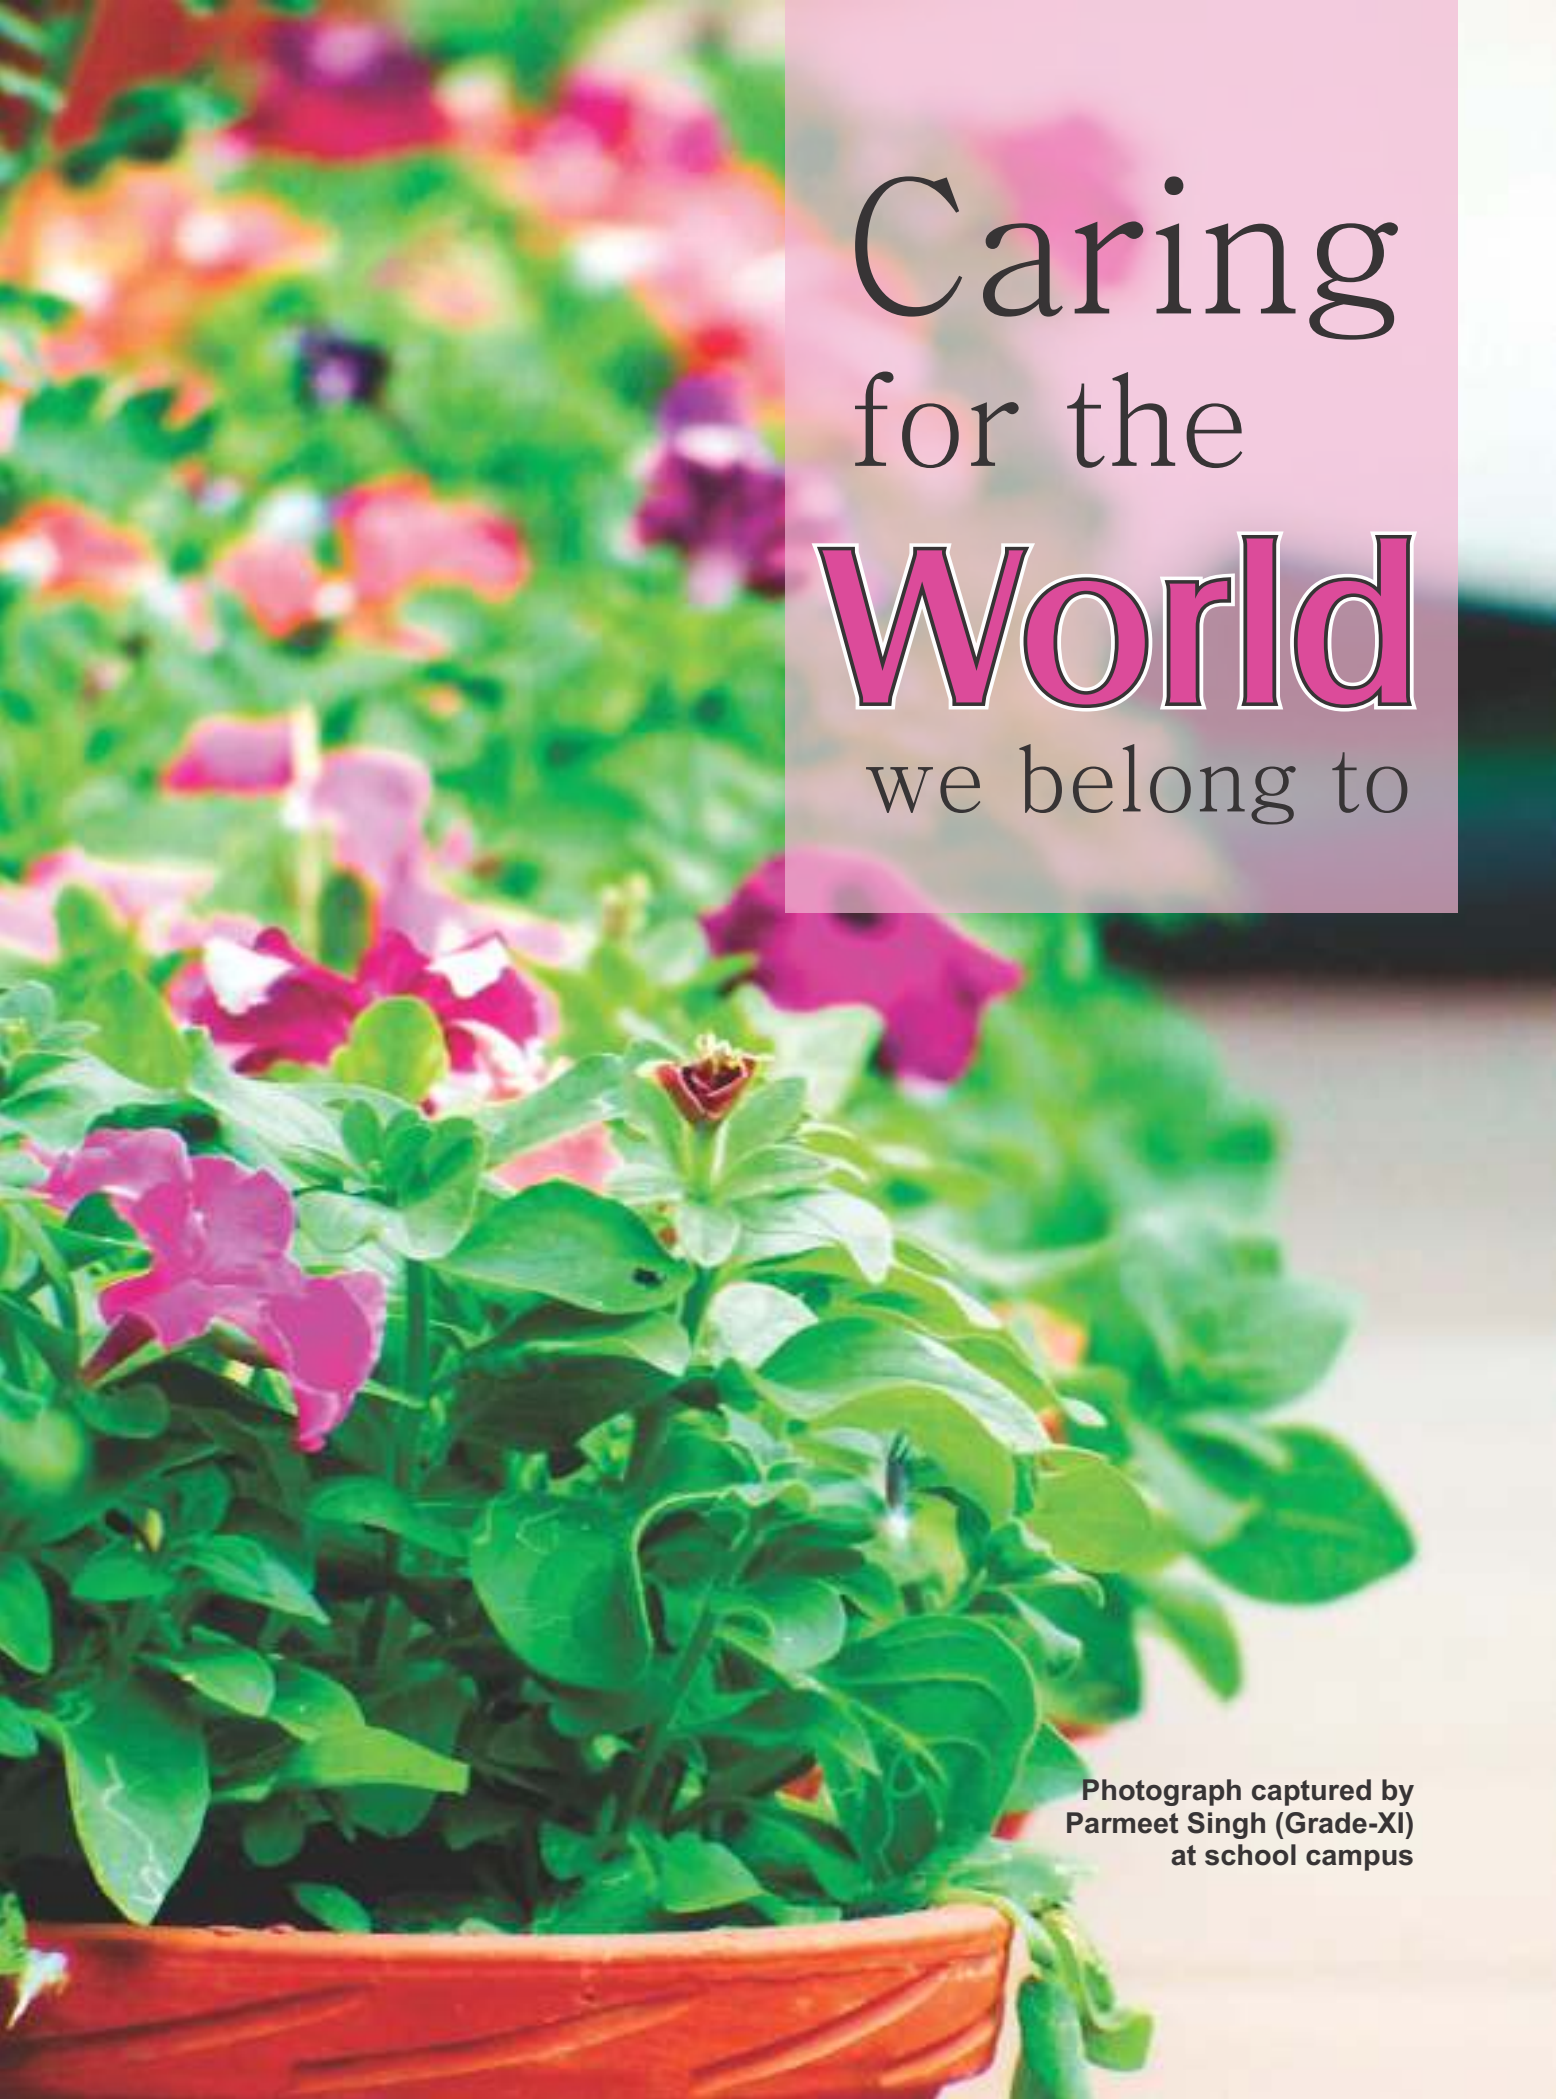

The structure of Dikshant Sat-I was made using a 3D printer. The different sub-systems of DikshantSAT-I include flight board, controllers, sensors, GPS Technology, power subsystem etc. The Airport Authority of India, Directorate General of Civil Aviation (DGCA), Government of India and other government agencies approved the launch of High Altitude Balloon DikshantSAT-I.

In the advanced stage, the school aims for its students to work on cube satellite (small satellite of around 10-centimeter cube only) with a specific mission and launch target into space in collaboration with ISRO. While learning all this, students will get ample opportunities to meet and interact with experts from ISRO and NASA as many exclusive workshops, faculty visits to the campus and audio-video sessions are planned for them in the future.

Joy of Giving

We strongly believe that children have the potential to become the real change-makers and we, as a school understand our responsibility to help them be the change. Students carry out different class projects in the spirit to give it back to society in all possible ways. These projects are spread over the year and are designed to spread happiness amongst the elderly, children, underprivileged sections of the society, differently-abled humans and to care for the environment.

Students of Kindergarten celebrated 'World Food Day' in a true spirit and with great enthusiasm. The parents and teachers of the kindergarten section helped to arranged a community meal for the needy, which our students served with a lot of joy.

Students of Grade II and III feeding animals at different animal shelters

Students of Grade-II visited WAGE (Waheguru Animal Welfare Organization), an organization that takes care of street animals. They guided students on how to feed the animals and also to inform the organization in case they see an injured animal.

Students of Grade VI organized a get-together with the students of evening school. To make the day special, students decorated the venue beautifully, got an additional tiffin to share the meal and fun-filled games. Apart from spending quality time with children, students also presented small gifts as a gesture of friendship.

Joy of Giving

Students of V B visited a slum area near BHEL Factory, Panchkula to celebrate Joy of Giving Week around Diwali. Students interacted with children of almost the same age group. Along with having fun, the importance of cleanliness and hygiene were discussed. Students presented the children in slum area 'Care Kit', which enclosed toiletries and items of personal hygiene.

As a part of the community project, students of Grade V A paid a visit to Red Cross Old Age Home, Sector 15, Panchkula. To break the monotony of day to day life of the elderly over there, students presented a small cultural program for them. They even involved the residents in singing and dancing, offered them sweets, spent quality time and sought their blessings.

Students of Grade XII joyfully celebrated Diwali with children of a nearby government school. They got involved with students in decorating their campus, and joyful activities like games, dance and songs. To add to the joy of children over there, students also took along light snacks which they distributed with lots of love.

Students of Grade IV went to Bal Sadan, an orphanage in Sector 12, Panchkula where they spent quality time with children.

Awareness Programs

Building pillars of good citizenship

Poster making on Energy Conservation

Session about the scope of recycling products by Mr. Ashok Sharma, CEO of Shivalik Solid Waste Management Ltd

Messages by students of primary section to save trees

Students exchanging waste paper with recycled stationery

'24 Hours of Reality :Truth in Action' - a global conversation on the truth of the climate crisis held at the campus on 21st Nov. 2019. Main idea of the talk was to make students aware about the harsh realities of our planet. To overcome this existential threat some bold solutions were also discussed by Mr. Naveen Trivedi, Climate Reality Leader, APSWDP and his team.

Students handing over 'Thank You' cards for Defence Personnel

'Run For Health' Marathon to spread awareness about healthy life style.

Awareness Programs

Building pillars of good citizenship

Cleanliness Drive

Mime

To mark the 150th Birth Anniversary of Mahatma Gandhi various activities were carried out in school including a mime on the life of Mahatma, Poster Making, Debate, Group Discussions and Cleanliness Drive.

Students of the Eco Club spreading awareness about environment and water conservation. They demonstrated different methods of water conservation like using bucket instead of taps for cleaning car, avoiding use of shower for bathing, re-using RO water for cleaning and watering plants and rain water harvesting.

Students taking oath of the Preamble on Dr. Ambedkar Jayanti - The Constitution Day on 26.11.2019 . Students were informed about the Drafting Committee and Framing of Constitution in school assembly.

Morning assemblies are an important part of school life at Dikshant. Every day, the students assemble and begin the day with prayer, news and discuss important topics by presenting them in a very interactive manner. As a part of our school culture, each and every student participates in school assembly which gives them self confidence for public speaking. Students get a platform where they can share feedback of school programs, their experiential moments, stories and celebrate all special days. All the assembly activities are aimed for life skill development among students. The special assemblies are held from time to time to provide training in social behavior, facilitate moral and religious development, celebrate national days, birthdays of great leaders, poets, scientists and writers. Students are also motivated by positive reinforcement in the form of praise or rewards awarded for academic and co-curricular activities.

Teacher Training

The world that teachers are preparing young people to enter is changing rapidly. The teaching skills required to cater to these changes are evolving likewise. Therefore, a continuous professional development program is carried out for the school teachers to help them reflect upon their competences, keep them updated, and develop them further.

Mr. Navneet Trivedi (Parent of Aniruddh Trivedi-Grade III) conducting an awareness session for students of middle school

Ensuring Smooth Transition of Students

'What helps and hinders a successful transition'

At school, we give a lot of importance to the smooth transition of our students, especially from primary to the middle school. and middle to the high school.

Transition from primary to the middle school.

This transition is particularly significant as this is the time when children get ready to step into their adolescent phase and at the same time come across the major changes in the curriculum. The handling of these changes can be at times challenging for children as well as their families.

To ensure that children get adequate support from all of us during their transition process, a session 'What helps and hinders a successful transition' was organised for parents of Grade V on 12th January. The discussion revolved around helping children to handle the changes that take place in the curriculum from primary to middle school, the future impact of the development programs that start at school from Grade VI onwards and preparing them for adolescence. Dr. Reena Goyal, an adolescent health specialist gave some tips to get ready for the cognitive, emotional, physical, social and behavioural changes which start when children enter age 11.

Transition from middle to high school.

Keeping in mind the transition phase of students from Grade VIII to IX, a seminar was organised for parents of Grade VIII on 9th of February. Problems faced by youths, their career paths and major changes in the curriculum were discussed in the seminar.

Run for Health Mini Marathon

As a part of the fitness drive, the first edition of “Run For Health” mini marathon was organised this year. The marathon marked the conclusion of the celebration of ‘Good Health Week’ which started on the World Health Day i.e. 7-Apr-2019. As many as 250 students from the age group 11-17 years ran to promote healthy living. The 4 Kms race was flagged off by Mr Mitul Dikshit from the starting point marked near Maya Garden Magnesia on Chandigarh Ambala Highway Zirakpur. The team of ‘Weekend Runners’ and ‘Rohan Book Shop’ supported the marathon by providing the technical assistance. We are glad that our students participated in it with great energy and enthusiasm.

MARATHON WINNERS

SENIOR BOYS

Manan- X A , Manjot - IX A, Krish Chabbra - IX B

SENIOR GIRLS

Sehaj - XI, Raveena - XI, Anushka - X A

JUNIOR GIRLS

Prishnoor - VI B, Adya - VI B, Drishty - VI B

JUNIOR BOYS

Founders Day Celebrations

24th Feb 2019

Celebrating the Spirit of Dikshant

Annual House Awards

Co-curricular Trophy- Siddharth House

Sports Trophy- Sarvepalli House

Efficiency Trophy - Vivekanand House

Achievement Day

Founders Day is celebrated as Achievement Day to recognize and celebrate the efforts and achievements of students and teachers. The winners of different Class and House Competitions are felicitated on this day. Besides giving awards to the winners of different competitions, the students who have demonstrated exemplary behaviour and lived out the school values are also recognized. In primary classes, all students are encouraged by awarding certificates for whatever field they are best in.
